6	2008-09-16 15:15:11	2008-09-16 15:15:12	Oakley	INFO	542	13
	Description		Die IP-Sicherheitsrichtlinie für ISAKMP/Oakley verwendet einen Verschlüsselungsalgorithmus, der aufgrund von Exportbeschränkungen für Kryptografie ungültig ist. Die von ISAKMP/Oakley verwendete 3DES-Verschlüsselung wird auf eine Standard-DES-Verschlüsselung herabgesetzt. Dies verursacht im Allgemeinen keine Probleme. ISAKMP/Oakley kann weiterhin IP-Sicherheitsparameter aushandeln und die Aushandlung mit DES-Verschlüsselung schützen. Wenden Sie sich an den Netzwerkadministrator, wenn Sie trotzdem verlangen, dass die ISAKMP/Oakley-Aushandlung durch 3DES-Verschlüsselung geschützt werden soll.
